DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed August 15, 2008 are acknowledged.
2. Examiner acknowledges amended 1.
3. The rejection of claims 1-7 and 49-51 under 35 U.S.C. 102(e) as being anticipated by Sato et al., U.S. Patent Number 6,893,743 is overcome by applicant's amendment.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 19 is rendered indefinite because the claim lists formula H1. There is no definition for formula H1.

Allowable Subject Matter

6. Claims 1-18, 20-35 and 43-51 are allowed. Applicant claims an organic electroluminescent element comprising an anode and a cathode with a component provided therebetween wherein the component layer comprises a phenylcarbazole compound represented by general formulae 1, 3, H2, H3, H4, I1, I2, I3 and A. The closest prior art, Sato et al., U.S. Patent Number 6,893,743, teaches an organic electroluminescent device comprising an anode and cathode with an organic layer disposed therebetween wherein the organic layer comprises a

phenyl carbazole compound. Sato fails to teach or suggest a phenylcarbazole compound with the required substitutions as claimed in present claims 1, 8, 15, 22, 29, 43 and 45.

Response to Arguments

7. Applicant's arguments with respect to the present claims have been considered but are moot in view of the new ground(s) of rejection.
